A Message from The DHB Child Health Team

Measles has now arrived in Hawke's Bay after spreading around NZ in recent months.

Measles is a highly contagious disease and more than one in four people who catch it will be admitted to hospital.

The best protection against measles is immunisation – MMR (Measles, Mumps and Rubella) ideally given at 15 months and 4 years of age.

If you have children that are not immunised, we strongly encourage families to go to your GP as immunisations can still be given.
